

Short courses Module 13. – Lean Construction inc. Value, Risk and Quality Management

from The Academy of Constructing Excellence's Diploma in Managerial Excellence in Construction & Engineering (NZQA Lvl. 6 DipMEEC).

Course Description

The module provides an introduction to the basic principles of Lean, Value, Risk and Quality and their application to the management process within corporate enterprises.

Learning Outcomes

The aim of this module is to provide an introduction to the principles of Lean, Risk, Value and Quality and to show how these principles can be applied to the management process within corporate enterprises. On completion of the module, participants will be able to:

- demonstrate a knowledge of the core body of knowledge relating to Lean, Risk, Value and Quality and application to the management process within corporate enterprises,
- Implement lean principles to engineering and construction related organisations
- Implement risk management tools
- Implement value management tools,
- Understand and apply basic principles of quality assurance and quality control.

Tutors

Amanda Warren

Amanda is a Managing Partner of Constructing Excellence (NZ) Ltd. and is an experienced Management Consultant. She has delivered successful outcomes on a wide range of change programmes specifically within the construction sector both in UK and NZ. Previously she worked with MACE in the UK and lead significant elements of the UK construction change movement.

Industry Leader Guest Lecture

Thursday – Peter Fehl, Director, Property Services -University of Auckland.

Peter has a very broad base of industry experience as well as running his own company, on civil engineering and commercial construction projects. More recently he has focused on business and strategic planning and dispute resolution for a variety of clients. In 2009 Peter chaired the Dept Building & Housing's Construction Taskforce.

Friday – Peter Gomm, CEO Mainzeal

Peter joined Mainzeal in 2007. He brings significant experience at the general management level in the construction industry, coupled with the bottom line responsibility of the delivery of many major international construction projects. Peter is passionate about leading change within the NZ industry.
