

Construction Clients' Group 2016 Benchmarking Report

Do you know how well your projects perform?

The 2016 National Construction Benchmarking Report allows you to discover where your projects performance stand and use this knowledge to improve.

The National Benchmarking Report benchmarks your projects performance – time, cost, quality, client satisfaction and safety against NZ and UK' current and past performance.

Join the industry in measuring the construction sector's performance both as a whole and for the first time, the opportunity to measure your business's project performance within the industry.

As an experienced Client or supply side organisation with existing metrics and reporting systems within your projects and business reporting, this is a quick step change. From the resulting detailed performance picture, you can use this knowledge to transform performance within the current rapidly changing market.

- For the supply side – a focus on maintaining sustainable profitability and resourcing efficiency.
- For Clients - an ability to direct efforts to better manage time and costs inside budgets
- For project teams - finding common areas to strengthen working relationships

2016 National Benchmarking Report

For projects completed in 2015

Submitting data is a straight forward process whether for one project or multiple projects. Data collection is open now and closes 30 September 2016. The report will be published in November 2016.

Now in the sixth year of data collection for the New Zealand construction industry you are also contributing to sector improvements via this 'free to market' tool for all the industry.

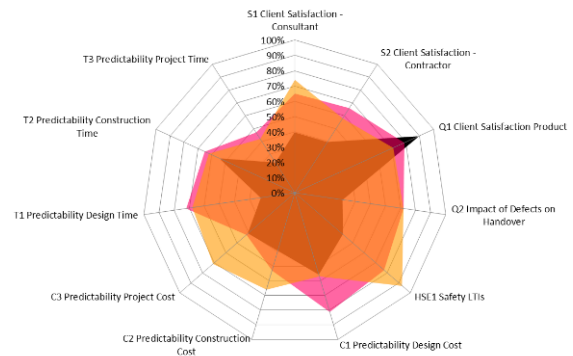

All data is anonymous, kept confidential and securely stored.

Construction Clients' Group 2016 Benchmarking Report

For mature businesses we are also introducing the **Benchmarking Network** – your individual project performance report.

The Benchmarking Network is a new initiative presented by the CCG. It's an opportunity for organisations to learn how well their own projects are delivered – compared to their direct peers, their sector and internationally. As a first step you will receive a **tailored report**, complete with analysis, recommendations and 'next steps' - all written by experienced industry experts¹.

It also provides the basis for ongoing measuring, year after year to track individual performance and for internal company performance reporting.
