

Short Course Module - AUCKLAND

Programming for Commercial and Risk Management

2nd June 2016

The Academy of Constructing Excellence

Key Factors	Details
Module Name	Programming for Commercial and Risk Management
Where	IMNZ, 4th Floor, DLA Phillips Fox Tower, Auckland CBD
Brief Description of Module Content	<p>This workshop is a programming / scheduling course with a difference. The workshop will begin by covering the importance of programming and what the requirements are contractually for NZS3910.</p> <p>With this in mind the focus will be on how to compile a contract schedule which at the same time enables the effective commercial management of a project. Effective commercial management helps to:</p> <ul style="list-style-type: none"> objectively assess the cost impact of change, mitigate delays, minimise abortive work, avoid disputes, mitigate cost escalations, increase effective communication and collaboration between parties, and increase the chances of delivering a successful project. <p>The workshop is aimed at contractors, consultants and clients. Whilst a programme is usually produced by the contractor or consultant, clients need to be aware of what ought to be produced and can enhance their programming requirements in their requirements.</p> <p>A laptop with MS Project (2010 or later edition) is required for this Module.</p> <p>It is also desirable for delegates to bring a copy of NZS3910 (2013 edition) to the Workshop.</p>

Learning Outcomes	<p>On completion of the module, participants will be able to:</p> <ul style="list-style-type: none"> Understand the importance of good programming. Understand the programme requirements for a standard form of contract (NZS3910). Produce a programme that can be used as a commercial management tool for a project. Revise and update a programme. Apply the learnings to a case study <p>Attendees will receive feedback on the case study.</p>
Lecturers	<p>Garry Miller</p> <p>Garry is a Civil Engineer and an experienced professional in the design, procurement and delivery of capital works. With over 25 years of industry experience he has advised public and private sector clients in the health, property, energy, transportation, water and telecommunications sectors. Garry developed his credentials as a project manager with Arup and took primary roles in the delivery of major Public Private Partnership programmes for the UK government. Since moving to the southern hemisphere has taken a leadership role with an international consulting engineering company and the managing director role for a New Zealand SME. Garry is also a lecturer at the University of Auckland, and is currently a Director of Research for the Project Management Institution New Zealand (PMINZ).</p>
