

A membership network committed to influencing and improving business performance in all sectors of the construction industry

Independent and client-led, the Construction Clients' Group (CCG) focuses on improvement, innovation and knowledge sharing through events, guest speakers and networking opportunities. We believe clients need to lead performance improvement and to do this well, clients must grow and change to engender the supply side changes also needed.

Now in its second decade, the CCG delivers its national workstreams through regional centres in Auckland, Hamilton, Wellington, Christchurch and Queenstown – along with a collection of online resources and events.

Benefits of membership

- ✓ Free admission to over 30 high calibre events throughout New Zealand, led and attended by senior members of the industry
- ✓ Expand your personal networking and visibility in the sector
- ✓ Learn about outcomes focus, modern procurement, collaborative working, innovation, international experience and best practice
- ✓ Access the CCG members-only library of reports, best-practice guides, and other evidence-based information that the whole supply chain can use
- ✓ Talk to government and regulators to influence future policy
- ✓ Build common ground across the construction industry's vertical and horizontal sectors, spanning industry, clients, government and the research community
- ✓ Help improve industry performance in the built environment sector.

Who is it for?

The CCG provides an independent, collective voice for private and public (central and local government) sector clients with the construction supply chain, government and other key stakeholder groups.

We recognise that our members need to work together to deliver more predictable and successful project outcomes, and to encourage improved industry integration and enhanced collaborative working with construction clients.

What's new for CCG members?

- Over lockdown we had a record number of members attend CCG meetings through online platforms, so we will be providing these as a regular addition to our in-person meetings. Please check the 2020-2021 Program for further details.
- We are opening up a fifth centre – in Hamilton and the Bay of Plenty - to better serve our local members needs and drivers.
- The CCG has updated our Themes in our new Program to align with The Construction Sector Accords Workstreams.
- Events will consist of virtual meetings (primarily information exchange sessions) along with face-to-face events (workshop format with networking).
- CCG Steering Groups are now more focused on achieving meaningful engagement with Government and embedding change for improvement

Taking a leadership position

The ethos of the CCG

- Letting those best placed to lead actually lead – the CCG looks to lead on our appropriate strengths and core deliverables while supporting others who are better placed on aligned objectives, to curtail the duplication of roles
- Having clients take a leadership position in lifting industry performance, through:
 - 'setting the bar'
 - leading by example
 - understanding risk, collaboration and longer-term relationships
 - focusing on outcomes for end users and stakeholders
- Through our Steering Groups we aim to influence change on 'a best for industry' basis with Government and industry groups
- We work to effect specific and focused improvements in practices and methodologies through CCG Workstreams

Alignment with the Construction Sector Accord

- 01 Business Performance
- 02 People Development
- 03 Health, Safety and Wellbeing
- 04 Procurement and Risk

VISION of the Construction Sector Accord:

**“A high performing
construction sector for
a better New Zealand”**

CCG Specialist Workstreams aim to lead sector improvement in issues especially pertinent for organisations seeking to become Intelligent Clients. Workstreams are predominantly client led, with senior CCG members (including supply side and government agencies) representing the group and embedded into these workstreams. We focus on:

- **SiD (Safety by Design)**. Led by Doug Ray – Vector Ltd.
- **Excellence in Design Co-ordination** – understanding the issues and drivers of improving completeness, coordination, price and programme outcomes. Led by Dino Matsis – University of Auckland.
- **Facilities – including the National Facilities Management Best Practice Group (FMBP)** – Chaired by Ruth Jost – Panuku Development Auckland (for further details of this separate group, refer to www.constructing.co.nz/Services/FMBP).
- **Continuous Improvement and Performance Reporting** – linked to BRE (Building Research Establishment Ltd, owners of the UK's Constructing Excellence programme) for international project performance reporting. Led by Constructing Excellence (NZ) Ltd.
- **Modern Procurement** – looking at moving contracts to be more Outcome and collaboration based. The work on existing contract forms is led by Francois Baudet – Christchurch International Airport Ltd (CIAL). Further details on newer delivery models are led by the *Project 13 in New Zealand: Community of Practice*.
- **Forward Works Pipeline** – Work in developing granularity and usability is led by the Auckland Steering Group.
- **Beacon Projects** – Engagement with MBIE and TSCA is led by AT's Mieszko Iwaskow for the CCG Steering Groups.

CCG Program 2021

	Business Performance	People Development	Health, Safety and Wellbeing	Procurement and Risk
January				
February	Open Meeting (Networking)		Safety in Design Practice Forum (V)
