NZIM Diploma Managerial Excellence in Construction & Engineering (DipMEEC)

THE
ACADEMY of
 CONSTRUCTING EXCELLENCE

Cohort 17
Auckland
June 2014 – June 2015

Introduction to DipMEEC

The Academy of Constructing Excellence (ACE) is an established training organisation specialising in Excellence, Productivity, Value and Innovation in the New Zealand Construction Industry.

Our training course has been developed in partnership with NZIM and is designed for future leaders of our industry. The course is an NZQA accredited level 6 Diploma.

Aimed at individuals in the succession plan of New Zealand's leading sector participants, there is an emphasis on network building and collaborative working, i.e. contractors, consultants and clients, learning and developing together.

The success of this approach is measureable and borne out by the commendations from past and current students and their mentors, all of whom are now members of an Academy Alumni.

The programme teaches on all aspects of best practice and leading edge thinking on project and business management. Our modules have been developed by handpicked leading International practitioners who draw on world Best Practise.

The Diploma is unique and is now recognised internationally as World Class. It develops a 'World Class' industry here in New Zealand by helping to shape the hearts and minds of those in Leadership roles and those heading in that direction.

"Listen, learn and network with your industry peers as industry practitioners present the states and methods of international best practice. If you aspire to being a leader in engineering and construction – can you afford to not do a Dip MEEC?"

Alex James, Associate, Aurecon, Sydney

The Academy of Constructing Excellence

Key Themes

- **Risk Analysis & Contract Management**

This 2-day Risk Module addresses a direct industry call for up-skilling.

- **Practical Application**

Addressing the need for a practical course which equips candidates with real tools for successfully improving their businesses and projects. Students retain 50% by hearing and 85% by doing.

- **Culture and Innovation**

Helping the Candidates to develop their leadership skills and to grow their capacity to innovate.

I have the knowledge of the latest National & International Best Practice at my fingertips

I have the skills, motivation & competencies to lead Change & Innovation in my company & my industry

This is particularly important to the future of the industry as we move from a traditionally fragmented and often adversarial basis to a collaborative and integrated approach. The Academy brings experts in team dynamics and team make-up with an emphasis on self-awareness and insight. This prepares candidates to manage themselves and lead their teams with a new perspective on relationships and productivity.

- **Access to current Industry Leaders**

An Industry Advisory Panel (IAP) has been formed to provide an overview of course development. It comprises of leading industry figures. They are Managing Directors, Directors and CEOs who believe in industry change across consultants, contractors and clients.

"Dip MEEC has really opened my eyes to international cutting edge techniques, while allowing me to debate real issues with other members of the industry in NZ. I would definitely recommend this course to other client organisations."

Chris Young, National Programme Manager, NZTA

Uniquely Industry leaders from companies such as Arrow, Beca, Fulton Hogan, Auckland Transport, NZTA and NZIM bring their knowledge and skills directly to course participants.

Assessments

The accreditation process means that the student is assessed throughout the course. In addition, the student also works on an internal change project within their current project or their business

A fundamental consideration in developing the course has been to create employees who lead their organisations to progress towards world best practice.

Timing

The programme is run over a year, with the taught elements starting in June 2014. The project then finishes in June 2015.

There is an additional introductory session in June for Students and their Mentors, which is designed to orientate and to provide answers to any questions about the course.

Registration

Registration for Cohort 17 closes on May 31st 2014, with a 10% 'early bird discount' available prior to April 30th 2014. Investment is \$12,000 (plus GST) for NZIM or CCG members, \$14,000 (plus GST) for non-members. To register, click the link at www.theacademy.co.nz.
