Managing a Major Project

*What does it take to successfully manage
NZ's largest civil engineering project?*

The **Waterview project** is New Zealand's largest civil engineering project. Successfully managing this poses a huge challenge. **Peter Norfolk**, civil design engineer for the Well-Connected Alliance, will present an overview of the project management practices being utilised on the Waterview project and, in particular, the aspects that are proving to be key to its success.

About Peter Norfolk

Peter is a professional engineer with more than 20 year's post-graduate experience in civil and geotechnical engineering. He has worked both internationally, primarily in South-East Asia and China where he spent 13 years, as well as in New Zealand. He is currently appointed as the Civil Design Manager for the Well-Connected Alliance delivering the Waterview Connection Tunnel project.
