\$4.1bn

# Reporting to joint Ministers

- Consensus that BAU in a resource constrained market won't work
- We require a more co-ordinated programme managed approach to the rebuild
- With visibility of what projects will happen and when
- More demand data from a broader range of clients
- A more comprehensive understanding of the supply market
- And utilise whole construction market capacity
- Potential impact on private sector re-investment in the CBD
- Potential impact on the national macro-economic environment
- Addressing a management issue
- Developing an ambitious but feasible re-build programme
- Cabinet paper

# A different type of sector engagement

- More proactive
- Visibility of a managed forward work programme – enhanced certainty
- Sector engaged earlier in the project process
- Explore alternate procurement methods – **pre-approved panels of suppliers**, bundling
- CERA in lead co-ordination and management role
- Supported by MBIE, Treasury and State Services
- MBIE providing procurement assistance
- Further collaboration – scheduling, logistics, project insurance, etc.
- Potential for additional innovation – BIM, batching plants, etc.

# Existing activity: encouraging collaboration

- Sharing of geotech data
- CERA viewer
- Catalyst project benefits
- Cash flow & support to supply chain businesses
- Development of master construction schedule
- Syndicated RFPs
- Market Information Day
- Sharing information with clients and suppliers
- Other innovations
- National pipeline
