Proposed Auckland Geotechnical Database

AUCKLAND GEOTECHNICAL DATABASE

Progress to March 2014

- Strategy meetings held between Watercare and Auckland Council
- Initial proposal to develop Auckland Council based GIS database
- Provision of information now being included in Watercare tenders
- Pilot dataset being created
- Access granted to review Canterbury Geotechnical database

AUCKLAND GEOTECHNICAL DATABASE

Canterbury Geotechnical Database – Benefits/Issues

- Established and operational database
- Specification and Quality Controls already in place
- Relatively quick to get up and running
- Operating on Google Earth c.f. AC GIS
- MBIE, keen to roll out NZ wide
- Other parties interested in NZ wide database
 - GNS, EQC, Natural hazards response unit, potentially other government bodies
- ‘Window’ already opened for Hawkes Bay Region
- IP ownership (CERA)

AUCKLAND GEOTECHNICAL DATABASE

Next steps

- Continue to collect data and create pilot data set
- Clarification with CERA / MBIE re IP
- CERA role ends 2016 – On going ownership / management
- Use of GIS platform rather than Google Earth
- Joint Strategy Document with Auckland Council
- CERA approval to Open Auckland 'window' on Geotechnical Database
