Meeting No. 6 Invites you to join us in exploring  
**Innovation – Moving to an Outcomes Focus**

## Meet the speakers

### **Councillor Alexa Forbes, Infrastructure Committee Chair Queenstown Lakes District Council**

As a Councillor and chair of the Infrastructure Committee, I work towards introducing future focused systems that can improve life in the Lakes District. As a Lecturer on the Grad Dip Sustainable Practice programme at Otago Polytechnic's Centre for Sustainable Practice, I facilitate people working together to find innovative and collaborative solutions to issues. At Scope Media I provide mentor-ship and strategic governance advice. Prior to these roles, I worked for many years as a communicator - as a journalist and later as director of a PR company.

### **Tony Pickard, Transport Strategy Manager - Queenstown Lakes District Council**

Starting this year with a more focussed role in strategic planning for the complex transport networks in Queenstown. Last year's Master Planning in the Town Centre and the Wakatipu has provided a firm base for the bold moves ahead.

### **Steve Hewland, Project General Manager – The Headwaters**

As a professional engineer Steve has had a varied career from saw milling in the Coromandel to managing finances at the National Gallery in London. After an "OE" with his wife Katherine, Steve returned to Queenstown working as General Manager for a boutique structural engineering and architectural design consultancy. More recently, as the client representative Steve oversaw the construction of Camp Glenorchy, the first Net Zero Energy campground in the world. Steve lives on a lifestyle block near Glenorchy, where he is the co-founder of the local home brew club, secretary for the Glenorchy Community Trust, and a trustee for the Head of the Lake Trails Trust.

**Construction  
Clients' Group**  
CONSTRUCTING EXCELLENCE

## Meeting No. 6 Invites you to join us in exploring Innovation – Moving to an Outcomes Focus

### **What is the Construction Clients' Group?**

The Construction Clients' Group (CCG) is an independent membership organisation committed to improving the business performance of our members by focusing on innovation, best practice and knowledge sharing in enhanced collaborative working and supply chain integration.

Now in our 13th year, we have regional centres in Auckland, Wellington, Christchurch and as at 2016, Queenstown. The CCG promotes a learning and sharing environment for all organisations across the construction supply chain in business performance improvement through a better construction outcome.

### **Why Queenstown?**

With 13 years' experience supporting our Client Members and their supply-chains we have always been at the forefront of the industry – where it matters and when it matters – through the booms and the busts – and we are looking to keep adapting our engagement with members we get to both the growth and problem areas for the construction market.

### **Why now?**

Whilst never trying to be 'another player in the field' there seem to be issues and opportunities in the town and across the wider Queenstown region - issues that the CCG and its Members can support each other in addressing and learning from.

This meeting is an opportunity for us to bring regional leaders, local representatives of national organisations and new supply side and client players to engage to improve the efficiency of construction and asset ownership.
