

Christchurch / Canterbury Earthquakes

Construction Clients' Group

28 March 2012

Details of Events

4th September 2010

22nd February 2011

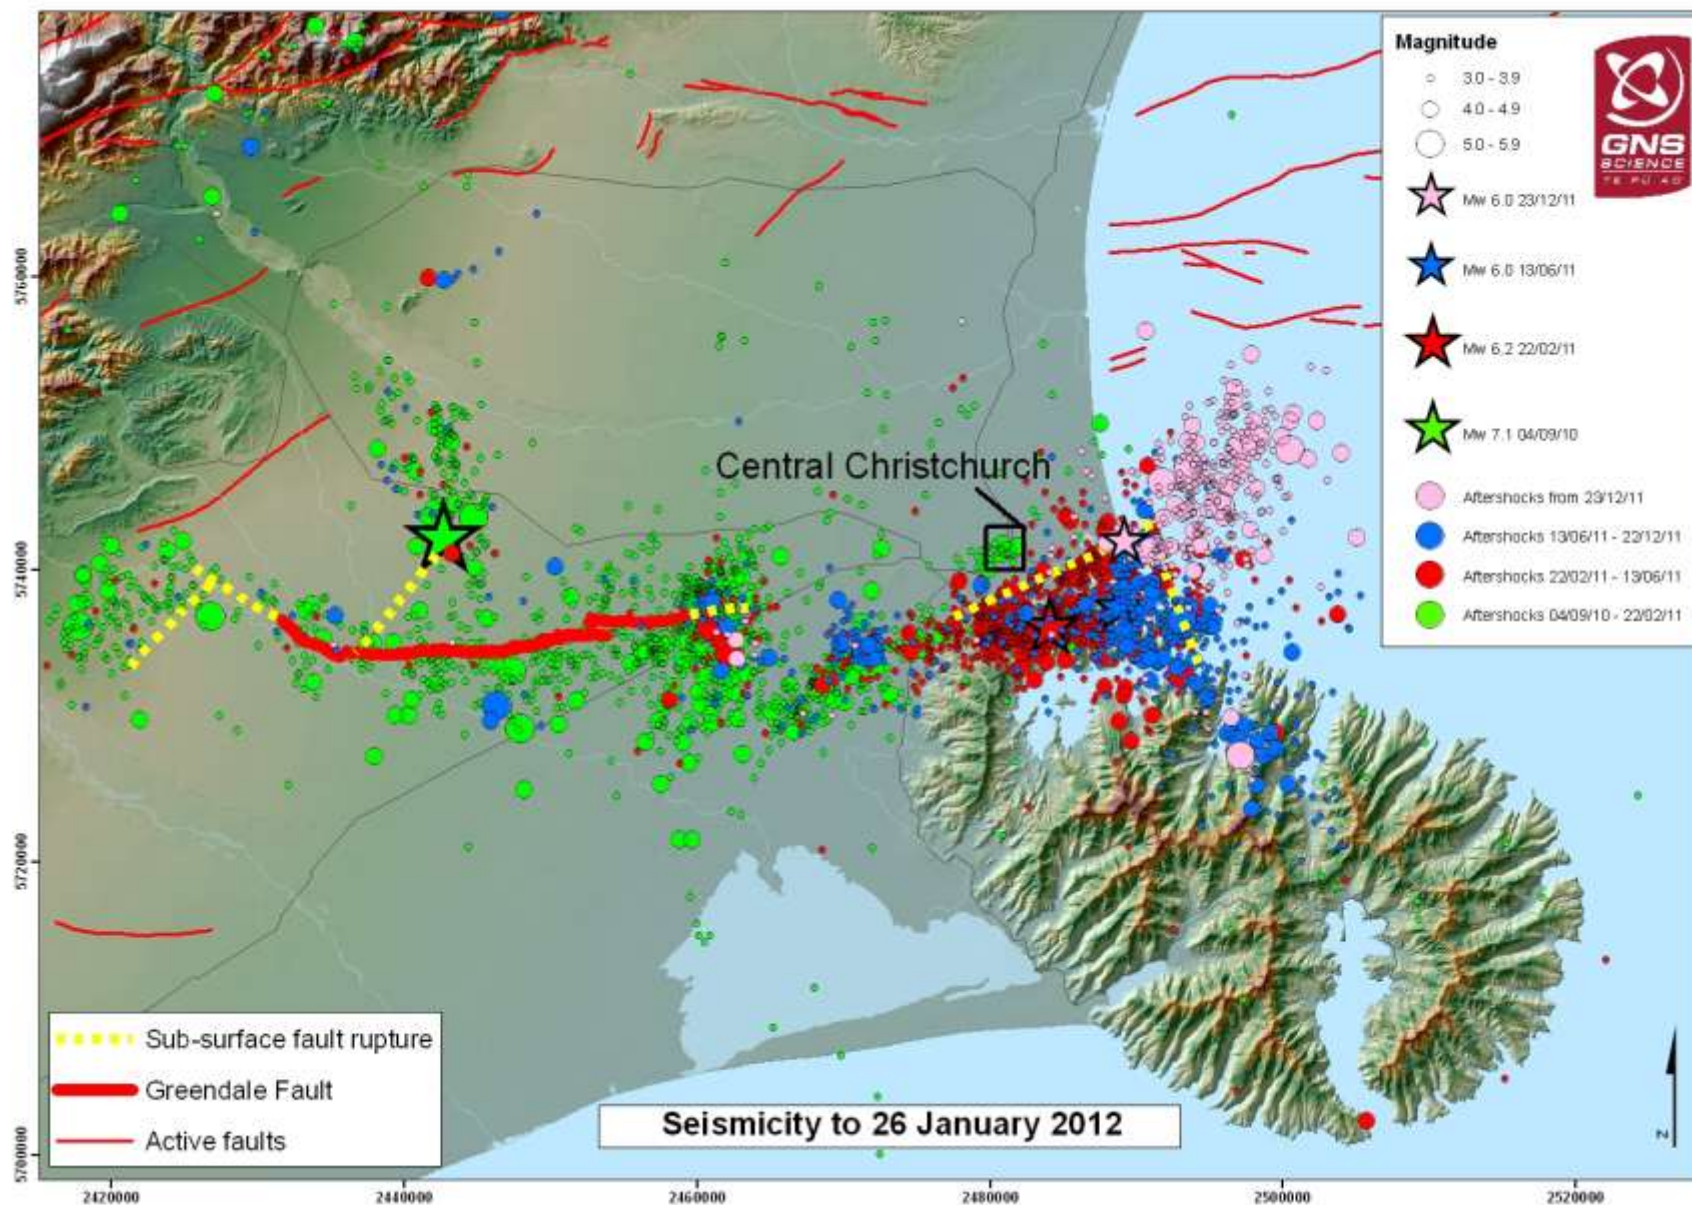

13th June 2011

23rd December 2011

over 10,000 quakes or aftershocks to date

Canterbury Earthquake Sequence – looking backwards & forwards

Kelvin Berryman – Director, Natural Hazards Research Platform

Legend

- Areas of observed liquefaction
- Port Hills area

Liquifaction

Liquefaction Silt

- Sep 10 – 30,000T removed
- Feb 22 - 430,000 T removed
- June 13 – 110,000 T removed
- Staging posts in city with semi trailers carting to Burwood
- 3000+ contractors and volunteers clearing silt during peak
- Approx 14,300 truck movements in 4 weeks post Feb 22
- One truck every 30 seconds at Burwood over 12 hours/day during peak.

How the City Responded

- Set key priorities with Civil Defence
 - Save life and provide shelter.
 - Get clean, safe water to people.
 - Open critical transport routes and provide sanitary services.
 - Get rid of the silt.
 - Clear the storm water system and prevent flooding.

How the City Responded

- Obtain Information on the extent of damage.
- Encourage Community to “Help Themselves”.
- Think ahead – must be strategic from day 1
- Use all resources available – student army, farmy army, government departments etc.
- Create a platform to deliver the Recovery phase of the work.
- **MAKE DECISIONS**

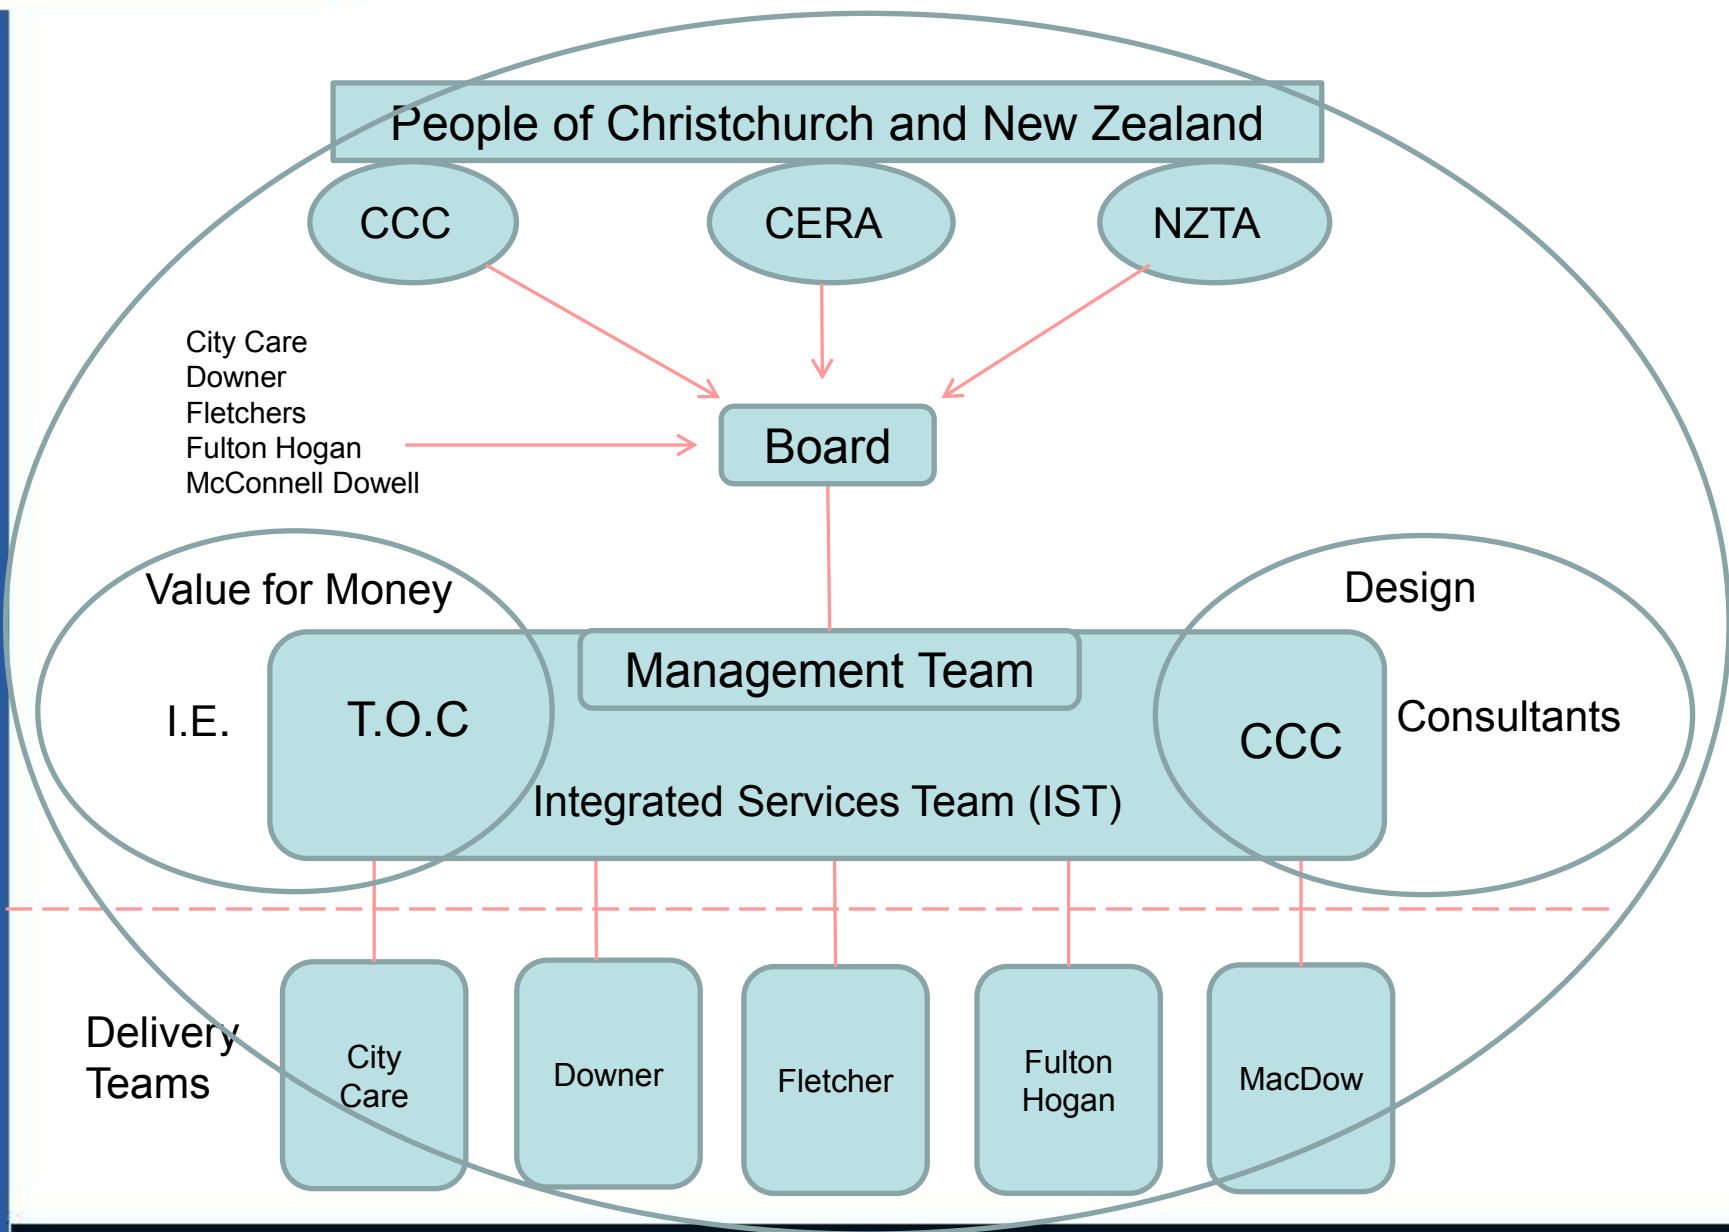

Transition – Emergency to Recovery

- (a) Emergency response - Infrastructure Rebuild Management Office (IRMO) established after September 4th
- (b) Escalation of scope - Civil defence after February 22nd to April.
- (c) Plan for recovery - SCIRT formed in response to increased scope on 4th May (IAA signed)
- (d) Recovery - Transition IRMO to SCIRT (1st September AA signed, responsibility transferred)

SCIRT Model

- Alliance Delivery Model
- Three Client Groups
- Five Contractor Groups
- Mix of integrated team and independent contractor teams
- Professional services to be engaged external to Alliance Agreement
- Design process to be managed across programme by integrated team

Stronger Christchurch Infrastructure Rebuild Team

Scope to be Delivered

Rebuild of Horizontal Infrastructure

- Sewer
- Water Supply
- Drainage
- Roads and green spaces

Ambiguous scope – subject to change with ongoing seismic activity and investigation

Programme of many projects across four infrastructure networks

Summary Statistics

Initial assessment for April budget purposes

| | Unit | Replacement/Repair |
|------------------------------|-------------|---------------------------|
| Water Reticulation | Km | 160 |
| Sewers | Km | 570 |
| Sewer Pump Stations | No | 11 |
| Stormwater | Km | 100 |
| Roading - residential | Km | 600 |
| Foot Bridges | No | 51 |
| Road Bridges | No | 94 |

Cost Estimate Summary

| Facilities | Rebuild Cost \$ million |
|---------------------|------------------------------------|
| Water Supply | \$150 |
| Sewer Works | \$910 |
| Stormwater | \$120 |
| Roading | \$725 |
| Bridges etc | \$95 |
| Total | \$2,000 |

Excluding:

- Land Remediation
- Damaged land (red zone) treatment
- Provision of services to new land developments
- NZTA Roads

Objectives

- Raise Bar in Safety (Contractors, Consultants and Industry in general)
- Demonstrated best long run Value for Money
- Manage process responsibly - balanced long term planning and programming vs rapid response
- Open dialogue across industry – vertical, horizontal and housing rebuilds
- Local labour resources – grow capacity through targeted training and development. Coordinated industry-wide approach.
- Optimise local and regional Contracting and Consulting capacity

Achieved to date

- Virtual Organisation to deliver \$500mill per annum
 - Development of Integrated Management Systems
 - Detailed ‘end to end’ process – incl systems to manage
 - Sourced, configured and activated Financial Tool - JDE
 - Developed process for prioritisation of projects – MCA tool
 - Developed Estimating protocols – aligned with IE
 - ‘Cradle to grave’ Programme Scheduling process - flows out of prioritisation

Achieved to date

- Strategic Review Process – completed Dec 2011
- Ongoing revision of Specifications to deliver ‘resilience’
- Co located Integrated Services Team – mid October 2011
- Engagement of Professional Services – 16 Consultants
- Transition from IRMO to SCIRT delivery – 1 Sep 2011
- High Performance Team Plan – developed and implementation commenced

Challenges Ahead

- Ramp up to \$30 million / month spend by June 2012, \$40 mill by Dec 2012
- Resourcing – including accommodation
- Containing inflationary market pressures – best value per dollar spend
- Positively influence the wellbeing of the team and the community
- Build confidence in client and stakeholder groups by delivering on promises

What's it all about?

***Creating resilient infrastructure
that gives people security
and confidence in the future
of Christchurch***
